PAINTING & DECORATING

What do Painters and Decorators do?

Painters and decorators apply paint, varnish, wallpaper and other finishes to protect, maintain and decorate interior and exterior surfaces of domestic, commercial and industrial buildings and other structures.

A Painter and Decorator may perform the following tasks:

- > work out the quantity of materials needed for the job by taking surface measurements or by looking at job specifications or drawings
- > erect scaffolding, cradles, ladders and place dropsheets to protect areas from dripping paint
- > remove old paint or paper using sanding, scraping, blowtorches, liquid paint removers and steam strippers as appropriate
- > prepare surfaces by fixing woodwork, filling or sealing holes, cracks and joins and washing them down to remove dust and grease
- > select and prepare paints to match colours by the addition of tints
- > brush, roll or spray the paints, stains, varnishes and other finishes
- > when wallpapering, set out the area according to the pattern match and starting point in the room, cut the paper to the appropriate length, apply paste to the back of each strip and hang the paper on the wall, smoothing out any wrinkles or bubbles
- > spray paint surfaces using a spray gun or specialised equipment
- > apply decorative paint finishes such as stencils, colour glaze, graining, marbling and lettering
- > wash equipment and clean work areas

Painters and decorators may concentrate on a specific area of work, such as the internal or external painting of domestic homes, commercial buildings or industrial structures and equipment.
